

THATSIT™ BALANS®

design: PETER OPSVIK

The Thatsit balans is the ideal chair for your daily deskwork. Runners and height-adjustable kneepads promote an open and dynamic sitting position that keeps your spine in its natural curvature and allows deep breathing. The chair gives your body the freedom to find its own equilibrium which keeps your back and abdominal muscles working. While tension in back and shoulders is prevented, this 'active sitting' improves circulation. Therefore oxygen levels and thus concentration and creativity are increased during your work. The adjustable back rest is designed to offer full support during relaxation. With the arms on the 'wings' you can stretch your upper body, raise your rib cage and breathe more deeply and freely.

OPTIONAL ACCESSORIES:

Backrest: The optional, adjustable backrest provides the dynamic variation ideal for a long day of work and relaxation.

Soft tapes: To protect delicate floors, available in natural and black.

BEECH WOOD:

MEASUREMENTS:

cm	Width	Height	Depth	Seat height
Chair	56	93-103	92	51
